

FORTUNE NEXUS MARINE

MARINE TECHNOLOGY

SHANGHAI · MARINE & OFFSHORE ENGINEERING

Electrical & Hydraulic Solutions. Built around your project.

Electrical equipment, custom hydraulic power units and technical support for marine and offshore engineering — configured around your project specification.

ABOUT US

Connecting marine needs with technical solutions.

Shanghai Fortune Nexus Marine Technology Co., Ltd. focuses on marine technical services and related equipment supply — bringing together electrical and automation equipment, hydraulic products and custom power units, and project-specific engineering enquiries in one place.

Our broader business scope also includes technical consulting and development, ship design, offshore supporting-system development, equipment supply, and goods and technology import and export.

INDUSTRIES WE SERVE

Two application areas — Marine and Offshore Engineering.

01

Marine

Electrical and hydraulic equipment for newbuild, retrofit and vessel upgrade projects.

Shipbuilding

Vessel Upgrades

02

Offshore Engineering

Project-specific electrical and hydraulic equipment for offshore engineering, including offshore oil & gas applications.

Offshore Oil & Gas

Installations

Every project starts with your technical requirement — the following pages set out our electrical and hydraulic product range.

Distribution. Control. Integration.

Electrical equipment enquiries for shipboard and offshore applications, configured around the project specification.

01 Switchboards & Distribution Panels

Main, emergency and distribution equipment enquiries, configured to the vessel or facility's power arrangement.

02 Control Panels & Motor Starters

Motor starting, equipment control and interface requirements for shipboard and offshore machinery.

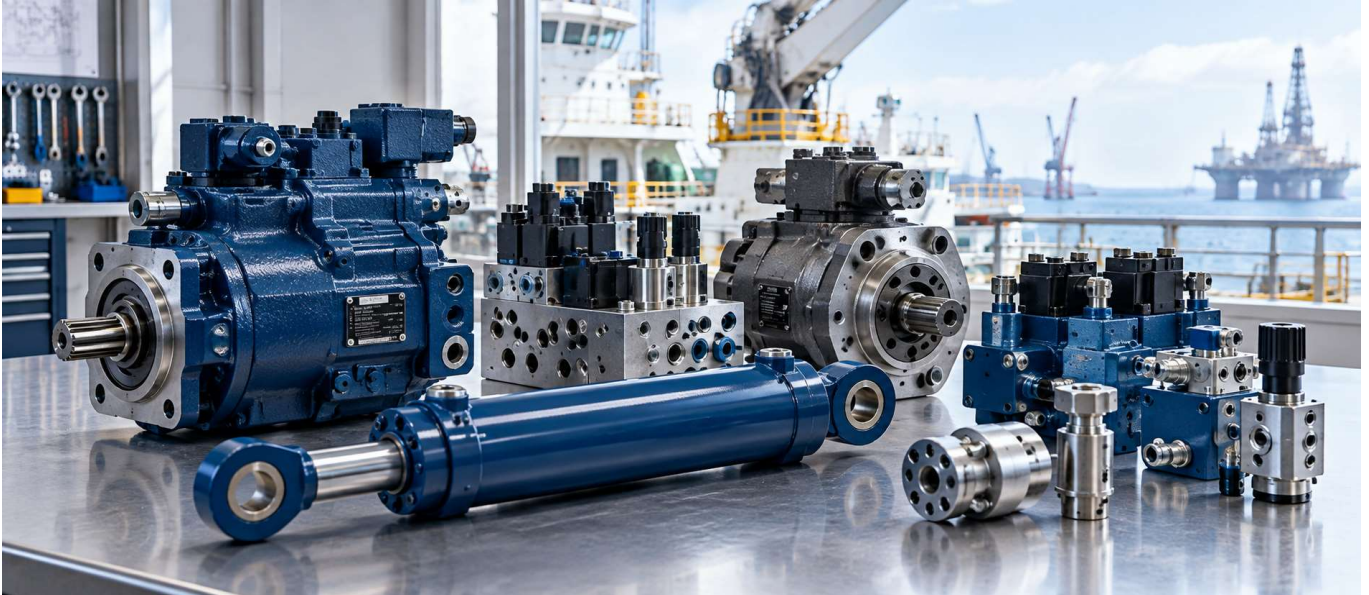

03 Control Consoles

Operator layouts, control functions and monitoring interfaces for bridge and control-room applications.

For transformers, shore power and automation system enquiries, send your technical specification.

Hydraulic Products.

Project enquiries for hydraulic pumps, motors, valves and cylinders — chosen around the operating duty.

01 Pumps & Motors

Flow, pressure, speed, mounting interfaces and fluid requirements for the driven equipment.

02 Valves & Manifolds

Directional, pressure and flow control functions, and the hydraulic connections between them.

03 Hydraulic Cylinders

Load, stroke, mounting, operating cycle and environmental conditions define the selection.

Need a complete power unit? See Custom Hydraulic Power Units on the next section.

Custom Electrical & Hydraulic Systems.

Personalized configurations for both electrical and hydraulic scope — built from your operating requirement, not a catalogue part number.

Custom Electrical Systems

- Voltage, frequency, phases and load schedule
- Switchboard, control panel and console layout
- Automation, monitoring and alarm interfaces

Custom Hydraulic Power Units

- Operating duty: pressure, flow and cycle
- Tank, cooling and installation environment
- Class, hazardous-area or certification needs

How we work

01

Define the duty

02

Review the configuration

03

Agree the scope

CONTACT

Tell us about your project.
